

# ML-18

**2800  
pounds**

Redundant spring  
holding force on  
EACH throw rod

**Newest  
Safest**

Mainline  
machine on the  
market

## ZERO MAINTENANCE REQUIRED

Automatic center locking  
system for safety during  
installation and/or while

Machine is trailable and requires  
no regular maintenance. Has all  
sealed bearings and no grease  
or lubrication points.

Closed loop hydraulic  
system with metal lines  
uses aircraft hydraulic fluid  
for long service life and to  
work in all environments.

Spring holding force is  
monitored on both throw rods.  
Any lost holding force is  
immediately detected with our  
unique proximity sensor.
